Professional Experience

Freelance Developer

Self-Employed — Remote / Local Jan 2024 – Present

- Developed custom websites and AI-based utilities for local shops and friends, delivering tailored tech solutions on demand.
- Created intelligent chatbots and AI scripts using **Python**, **OpenAI API**, and **LangChain** for business use cases like lead generation and FAQ automation.
- Collaborated directly with clients to understand requirements, deliver rapid prototypes, and deploy solutions on hosting platforms like **Vercel** and **Render**.

Skills

- react js
- next js
- MongoDB
- html css js
- langchain ,
langgraph ,
langsmith
- tailwind ,shadcn
- n8n , autogen
- python
- streamlit , chainlit

Projects

NeuroSight

Built an intelligent AI agent using Gemini 2.0 Vision capable of understanding both images and real-time video streams. The agent performs visual perception, scene understanding, and responds intelligently using natural language reasoning. Key use cases include: AI Assistant for the Visually Impaired – describes surroundings from live video Smart Surveillance Bot – detects people, objects, or activities and summarizes events

NeoTutor

NeoTutor AI is an AI-powered career mentorship platform that offers personalized learning experiences, resume optimization, and mock interviews. Built using Next.js, Tailwind CSS, and ShadCN UI, with AI integrations like Gemini API and scikit-learn. Features include interactive AI tutoring, smart resume builder with ATS feedback, and AI-powered interview simulations.

ML-gini

EDA Agent is an AI-powered Streamlit app that performs smart exploratory data analysis and auto-detects the target variable. It analyzes dataset structure, identifies outliers, and provides tailored ML model and preprocessing suggestions. Built using Python, Pandas, Scikit-learn, and Streamlit, with interactive visualizations and one-click model training via Trainmode. Accelerates the ML pipeline by generating code snippets and insights for faster prototyping and experimentation.

Mitra

voice agent made with vapi and react it is a virtual bestfriend for lonely persons

pokeweb3

built a react based web3 game for a hackathon .
